Commercial

Fortis
LIVING

We were introduced to Fortis Living who were merging with another housing organisation to create the Platform Group. Working closely in the early stages with the architect, project managers and a very enthusiastic and engaging client we were asked to assist with the space planning on the two offices in Worcester.. Each floor encompassed a mix of open plan bench desking, breakout spaces, meeting rooms, collaboration areas with approximately 800 staff on each floor. We closely collaborated with the client on the design and style of products, using a different colour palette on each floor, choosing carpet finishes which complimented the upholstery. We had a 4 phase installation schedule with each floor being completed in very productive 3 day period.
